

FREIGHT WEBINAR

22nd July 12.30pm

OPTIMISING OUR FREIGHT NETWORKS IN DISRUPTIVE TIMES

ISSUES AND TRENDS IN SUPPLY CHAIN AND HOW DATA INNOVATION CAN GIVE COMPANIES THE EDGE

The freight industry has responded to significant shifts in demand in recent times and it continues to be faced with pressing issues. How to meet the evolving demands being placed on our supply chains, and how to do this in the most efficient manner?

This webinar will take us on a journey from industry overview, to an analysis of trends and issues, including last mile, and finish with a comprehensive review of how the most up-to-date data techniques can help companies to remain competitive in an evolving and expanding playing field.

This webinar is suitable for anyone from senior leaders to practitioners tasked with managing supply chains.
