

InboundConnect

Connecting
Logistics
Communities

32 x 77G depots

using Inbound in
Melbourne, Sydney,
Brisbane, Fremantle,
Adelaide, Townsville

4800 registered users (transport
companies, freight forwarders,
importers/exporters)

77G depots and other logistics
facilities continue to join the
'Inbound Connect community'

InboundConnect

COMMUNITY

**The Inbound Connect
community today**

Background – The 77G Depot Environment

Significant Compliance Requirements

ABF licensing and other regulations are wide-ranging, strict and enforced, with significant penalties for breaches.

Competitive Operating Environment

Depots compete on price and service. Volume can move easily and operational costs continue to rise.

Opportunities to digitize

There are many manual and paper-based processes that could be made digital to reduce costs and improve efficiency.

Inbound Connect Solutions for 77G Depots

Core VBS Platform

Connects depots to carriers to provide total visibility of what vehicles are arriving, when, and for what. .

Driver Arrival and ID Automation

Produces a digital ABF visitors log using 'smart' drivers licence scanners linked to our core VBS platform, with end to end traceability

WADSIC Cards

Issue WADSIC cards digitally which streamlines the process of depots complying with this requirement.

MANAGING CHANGE

Case Study – Qube Logistics

Qube Logistics introduced Inbound Connect's complete technology platform in all of its 77G depots nationally in 2021.

VBS – Qube Logistics eliminated queues and futile trips at their depots. Problems that had existed for many years.

Digital ABF Visitors Log – Qube Logistics automated and improved a previously manual and unreliable driver arrival and ID process.

Improved Safety – Qube Logistics reduced on-site incidents through better control of arriving vehicles, drivers and process.

Sustainability – Through the Inbound Connect implementation, Qube Logistics was able to significantly reduce their overall carbon footprint.

THE FUTURE

The **opportunities we see**

- ✓ Greater digitalization of 77G depot operations and compliance functions.
- ✓ A single representative association for 77G depots.
- ✓ Greater ABF consistency regarding licence conditions.
